DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 16-20,23,24 and 27-32 in the reply filed on July 1, 2004 is acknowledged. Claims 27-32 have been added.
2. In view of the above, the following action has been taken.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 16-20, 23 and 24 drawn to an optical recording/reproducing apparatus and method, classified in class 369, subclass 44.26.
 - II. Claims 27-31, drawn to an optical recording medium, classified in class 369, subclass 275.3.
 - III. Claim 32, drawn to administrative information an optical recoding medium, classified in class 369, subclass 272.
4. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant

case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination II specifies specific properties of light source wavelengths and optical head numerical apertures. The subcombination has separate utility such as carrying recorded information to be reproduced by an optical recording/reproducing apparatus that does not required the specified distances of the layers as in group I.

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination III specifies wherein the multi-layer recording medium contains administrative information recorded concerning the respective optical recording media and specifically the distance from a surface to the administrative information with respective medias. The subcombination has separate utility such as carrying recorded information to be reproduced by an optical recording/reproducing apparatus that does not required the specified distances of the layers as in group I.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as carrying administrative information recorded thereon concerning the respective recording media to be

recorded/reproduced by an information recording/reproducing apparatus that does not required the specific properties of light source wavelengths and optical head numerical apertures as in group II. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III and the search required for Group III is not required for Group II, restriction for examination purposes as indicated is proper.

7. A telephone call was made to Douglas P. Mueller on 10/12/2004 and 10/13/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
